

recomLine Toxoplasma IgG [Avidity]
recomLine Toxoplasma IgM [IgA]

NEW

Strip-Immunoassay with recombinant antigens for the detection of IgG, IgM, and IgA antibodies to *Toxoplasma gondii*.

Toxoplasma gondii is an obligate intracellular, parasitic protozoan that causes toxoplasmosis. Found worldwide, *T. gondii* is capable of infecting virtually all warm-blooded animals, but felines such as domestic cats are the only known hosts in which the parasite can undergo sexual reproduction. Although mild, flu-like symptoms occasionally occur during the first few weeks following exposure, infection with *T. gondii* usually produces no readily observable symptoms in healthy human adults. However, in infants, HIV/AIDS patients, and others with weakened immunity, infection can cause serious and occasionally fatal toxoplasmosis.

Recombinant antigens of *T. gondii* (including 4 different phase-specific avidity antigens) are used in the *recomLine* Toxoplasma assays.

Product #5972 recomLine Toxoplasma IgG [Avidity]
(20 tests per kit)

Product #5973 recomLine Toxoplasma IgM [IgA]
(20 tests per kit)
