

# c-Jun (Phospho-Thr239) Polyclonal Antibody

## **ORDERING INFORMATION**

## Catalog No.: 43024

Format: 100ul at 1.0mg/ml in PBS (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Affinity-purified on phosphopeptide; non-phosphopeptidereactive antibodies were removed by chromatography on non-phosphorylated peptide.

## BACKGROUND

c-Jun in combination with c-Fos, forms the AP-1 early response transcription factor. It was first identified as the Fos-binding protein p39 and only later rediscovered as the product of the c-jun gene. It is activated through double phosphorylation by the JNK pathway but has also a phosphorylation-independent function

## SPECIFICATION SUMMARY

Antigen: Peptide sequence that includes phosphorylation site of threonine 239 (G-E-T(p)-P-P) derived from human c-Jun and conjugated to KLH.

Accession no.: P05412, NP\_002219.1

Host Species: Rabbit

Specificity: This antibody detects endogenous human, mouse, and rat c-Jun only when phosphorylated at threonine 239.

# APPLICATION

Immunoblotting: use at dilution of 1:500-1:1,000. Immunohistochemistry: use at dilution of 1:50-A band of ~43kDa is detected.

1:100.

Detection of c-Jun (phospho-Thr239) in paraffinembedded human breast carcinoma tissue.

Detection of c-Jun (phospho-Thr239) in extracts of HeLa cells untreated or treated with UV.

These are recommended working dilutions. Enduser should determine optimal dilutions for their applications.

# **DILUTION INSTRUCTIONS**

Dilute in PBS or medium that is identical to that used in the assay system.

# STORAGE AND STABILITY

This antibody is stable for at least one (1) year at -20°C. Can be stored at 4°C for short-term use.

For in vitro investigational use only. Not intended for therapeutic or diagnostic applications.
